garden behind.**

 **GARDENA®**
smartsystem

gardena.com

Your garden won't notice you're gone. Because you won't be

The GARDENA smart system gives you the control you want and your garden the attention it needs. With the GARDENA smart App you have the power to keep your garden growing wherever you are.

Experience the next level of smart lawn care

Now available with LONATM Intelligence. The new smart SILENO contains an AI-based technology with location tracking that learns, maps and adapts to your individual garden. Relax while this intelligent robotic lawnmower quietly gets the hard work done.

It's 6 am – time to water the plants

Relax, water your plants the smart way: in a fully automated process and only when your plants actually need it.

Early in the morning, the soil has cooled down overnight, less water evaporates than if applied to hot ground. The plants are able to take up sufficient water in good time before the day warms up.

Let your plants speak for themselves

Sometimes it's easier to just listen – because thanks to the smart Sensor, your plants have a voice. Stay up-to-date with the latest information from your garden, directly on your smartphone.

Never leave your garden behind

With an intelligent irrigation system and robotic lawnmower, your garden is taken care of, from anywhere.

GARDENA smart system – all products at a glance

smart Water Control – at the tap

Water a single garden area with tap water. The smart Water Control lets you remotely control your garden taps for perfect results – simply controlled via the GARDENA smart App.

Using it with a smart Sensor, you can save water and ensure the right level of watering.

smart Irrigation Control – permanently installed and underground

Effortlessly water multiple areas of your garden with an underground irrigation system. The smart Irrigation Control manages up to six irrigation valves – each of which can be independently controlled via the GARDENA smart App.

Using it with a smart Sensor, you can save water and ensure the right level of watering.

smart Sensor

Measure the soil moisture and temperature in your garden or in planters and check it in the GARDENA smart App. Using the smart Sensor with a smart Water Control, a smart Irrigation Control or a smart Pump, you can save water and ensure the right level of watering.

smart Robotic Lawnmowers

Mow the lawn automatically the smart way. With the GARDENA smart App, you can control your smart SILENO Robotic Lawnmower to achieve a carpet-like cut for all lawn sizes up to 1,500 m². NEW: Now with unique LONA™ Intelligence, taking smart lawn care to the next level.

smart Power Adapter

Plug any electrical device into the GARDENA smart Power Adapter, e.g. your lights or fountain pumps and switch them on or off whenever you want, wherever you are via the GARDENA smart App. Keep your garden looking smart day and night.

smart Pump

Use rain water for your domestic needs with the smart Automatic Home & Garden Pump. Controlled via the GARDENA smart App, you can water your garden based on pre-set schedules, or even provide water to your toilet and washing machine.

Using it with a smart Sensor, you can save water and ensure the right level of watering.

To establish the connection to the smart system, you need the GARDENA smart App and the smart Gateway

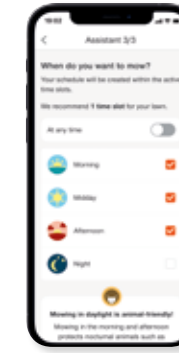

GARDENA smart App

Your entire garden is always at your fingertips with the free GARDENA smart App. Mowing the lawn and watering has never been so convenient. Even lights or other electrical devices in the garden are now easy to control.

EasyApp Control

Take care of your garden wherever you are, with a tap of our easy-to-use GARDENA smart App.

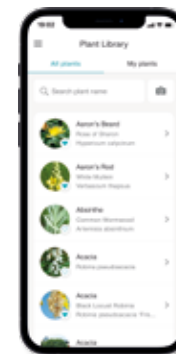

EasyConfig

Easy and guided set up. The GARDENA smart App provides step-by-step guidance for setting up your own smart system. With clear illustrations, tips and helpful wizards to create watering and mowing schedules.

Auto Schedule

No need for reminders ... the GARDENA smart App will do the job for you! All under control: when to mow your lawn, water your plants and more, wherever you are, with remote scheduling.

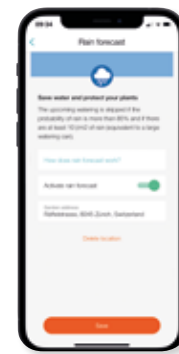

Plant Library

Discover everything you need to know about plants, from when they bloom to the climate they thrive in.

Sensor Control

The smart Sensor tracks temperature and soil moisture in your garden to optimise the irrigation and save water.

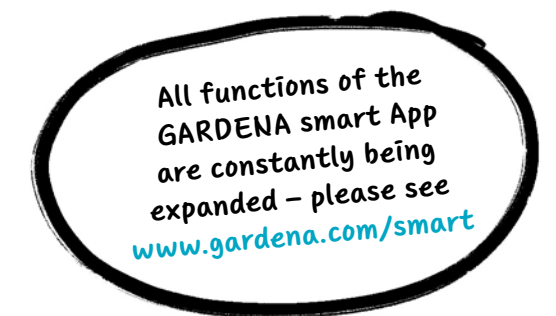

Weather forecast

Rain is coming? The GARDENA smart system App adapts your schedules based on weather data.

SmartHome

SmartHome meets smart garden. Integrate smart garden devices into your Apple HomeKit or control them by voice using Amazon Alexa.

smart Gateway

The heart of the smart system for wireless network communication.

- Establishes the connection between the Internet and the GARDENA smart system
- Simply connect to your wireless router via a LAN cable or WiFi
- Stable and secure connection for all smart system products
- Extremely powerful radio technology provides extensive coverage even in large gardens

Virtually all products are also available without the gateway as an extension.

smart Water Control

Fully automated watering of a garden area with the same water requirements.

EASY TO INSTALL
connect directly to a tap

WATERING ON DEMAND
automatically provides water from the tap based on schedules set in the GARDENA smart App

DIRECT CONTROL
simply press the button if water is needed immediately

RELIABLE
thanks to proven GARDENA valve technology

FROST ALARM
warns you before it is too cold to operate the smart Water Control

smart Sensor

Provides important information directly from the garden for optimum irrigation via the GARDENA smart App. Works with smart Water Control, smart Irrigation Control and smart Pump.

FLAT HEAD
can be placed in the middle of the lawn without disturbing a mower

MODERN AND COMPACT DESIGN
can be used anywhere in the garden or in planters on the terrace or balcony

SAVES WATER
communicates directly with smart Water Control, Irrigation Control or Pump and waters the garden only if it is really necessary

DIGITAL ROOT
extra large sensor zone measures the soil moisture where it matters most – at the root of the plant

smart Irrigation Control

Multi-channel control for an underground watering system. For up to six irrigation zones with varying requirements.

COMPATIBLE
controls irrigation systems with virtually all commercially available 24 V irrigation valves

FLEXIBLE
each garden area is supplied with water individually using corresponding irrigation schedules in the GARDENA smart App

PERFECT DUO
when combined with a smart Sensor, the water demand for each irrigation zone can be optimized with precision

SMART CONTROL OF EXISTING SYSTEMS
simply replace an existing irrigation control system with the smart Irrigation Control. That means a GARDENA Micro-Drip-System or Sprinklersystem can be controlled via the GARDENA smart App – while irrigation systems from other vendors become smart, too

smart Automatic Home & Garden Pump

Pump for supplying your home and garden with rain or well water in a fully automated process.

INDIVIDUALLY PROGRAMMABLE
for a time controlled, automatic garden watering

DIAGNOSTIC SYSTEM
with easy-to-understand information about potential faults and how to correct them

SMALL AMOUNT PROGRAMME
easy to use even with minimal water requirements

POWERFUL
1300 W, 5000 l/h, 5.0 bar, 2 outlets, integrated fine-meshed filter

SUITABLE FOR OUTDOOR USE
the pump is protected against sun and rain, therefore it can be placed anywhere in the garden

smart Robotic Lawnmower

Lawns can be mowed fully automatically - with reliable, stripe-free and even results. 4 different robotic lawnmowers for lawn care available for small, medium and large gardens. Now with unique LONA™ Intelligence, taking smart lawn care to the next level.

smart SILENO life

An overview of all smart robotic lawnmowers can be found on page 10

smart Power Adapter

Simply integrate lighting and other electrical devices into the GARDENA smart system.

Tips and tricks

Begin with a single application

Extend your smart system as you like it and when you need it

It is easy to start with the GARDENA smart system: Begin with a single application (mowing or watering Set including the smart Gateway) and extend your smart system as you like it and when you need it!

Easy installation thanks to the GARDENA smart App setup wizards.

A smart Gateway is required to operate the GARDENA smart system. This Gateway is included in all GARDENA smart system Start Sets.

Smart partnerships for the garden

Our GARDENA smart system enables intelligent irrigation and lawn care, anytime, anywhere. All in just one app. For an even better smart garden experience we open our system and make the integration of other smart devices possible through our GARDENA smart App. Today, you can already integrate Husqvarna's Automower. Even more possibilities arise through the connection to established cloud platforms: GARDENA smart system works with Apple HomeKit. Users can also control their smart garden devices by voice using Amazon Alexa or link them to other smart services and devices with IFTTT. Further smart devices and services will follow.

A current overview of the partner integrations as well as further information can be found at: www.gardena.com/smart
