# GARDENA Robotic Lawnmowers

THE intelligent robotic lawnmower. SILENO.

GARDENA Robotic Lawnmowers are intelligent devices featuring Full Connect, AI-precise and Auto Weather & Terrain benefits and are the quietest in their class. Our smart SILENO now also includes a new piece of hardware that will bring LONA™ technology to our smart Robotic Lawnmower range. The next level of smart lawn care with Location Tracking, Garden Mapping, Zone Management, Area Protect and many more features to come.

## Full Connect

Fully connected to the GARDENA smart system. Your garden is taken care of from anywhere\*\*.

Enhanced intelligence with

## AI-precise

The new LONA™ technology\* that learns, maps and adapts to your individual garden.

## Pro-silent

The quietest, best in class noise level.

## Auto Weather & Terrain

The SILENO works under all weather conditions, rain or sunshine, easy or complex lawns.

\*\* Get the full smart experience with our GARDENA smart range.

\* LONA™ technology is only applicable to smart SILENO city and smart SILENO life models.

# NEW LONA™ Intelligence

Experience the next level of smart lawn care with our new smart SILENO Robotic Lawnmower range that comes with LONA™ Intelligence. An AI-based mapping technology with location tracking that learns, maps and adapts to individual gardens. As part of the GARDENA smart app updates, LONA™ Intelligence will continuously evolve and deliver even more exciting and highly relevant product features to maintain your garden in years to come.

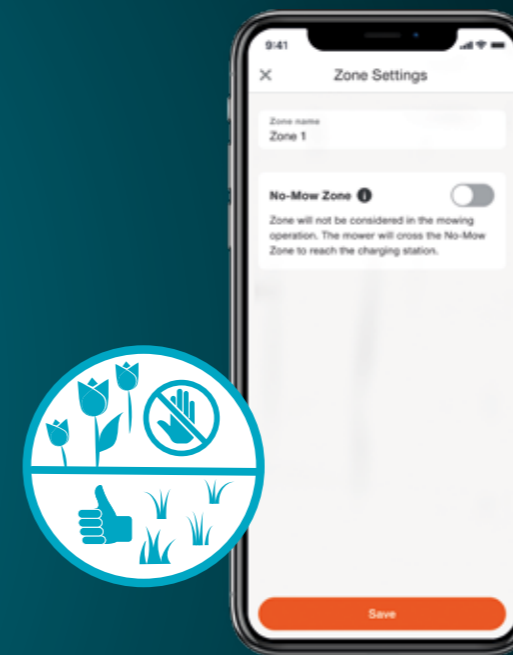

## Garden Mapping

Thanks to LONA™ Intelligence, the smart SILENO learns and maps your individual garden and creates a detailed map of the garden layout which can be accessed on the GARDENA smart App. The map shows the outline of the lawn, including boundary wire, guide wire and charging station.

## Zone Management

LONA™ Intelligence gives you the control of your lawn care. Easily define up to 3 virtual zones on the garden map through the GARDENA smart App. Define different mowing intensities and frequencies within these zones according to local conditions and needs.

## Area Protect

Easily protect specific areas in your garden from mowing, e.g. wild meadow. LONA™ Intelligence lets you define stay away zones on the garden map which can easily be adjusted on the GARDENA smart App at any time.

## Location Tracking

Open the GARDENA smart App and track the live location of your smart SILENO at any time. LONA™ Intelligence locates your robotic lawnmower using GPS and compass data.

# The SILENO robotic lawnmowers help you to maintain your lawn just right

More features of the SILENO robotic lawnmowers.

## CORRIDOR CUT

Mowing even difficult or narrow passages from 60 cm between the boundary wires is no problem thanks to the CorridorCut function. Due to a special mowing pattern the lawn is cut evenly.

## UNCOMPLICATED

Simply clean the SILENO using your garden hose. And you are ready to go!

## CUSTOMISED

All models also have the SensorControl function: The intelligent cutting system automatically adjusts the mowing time based on grass growth.

## CLEVER

With SpotCutting, a spiral mowing function ideal for hard-to-reach areas such as under trampolines or garden furniture.

## FROST SENSOR

As soon as the outside temperatures approach freezing, the schedule of the robotic lawnmower is suspended. This protects the lawn, as mowing damages the grass when it is frozen.

**FLEXIBLE**  
How much should be cut?  
The cutting height can be  
adjusted flexibly.

**EXACT**  
Proven technology provides precise results:  
Thanks to the GARDENA boundary wire,  
the robotic lawnmower knows exactly where  
to mow – down to the exact centimeter.  
The boundary wire and guide wire do not have  
to be buried and will be invisible after  
a few weeks as the grass grows over them.

**EASY TO INSTALL**  
Quick and easy installation. Charging station  
can be flexibly placed inside or also outside  
the mowing area. See our installation video  
online for more information.

# Support and service

How do you get a beautiful lawn and gain more time? With a robotic lawnmower. But which robotic lawnmower is the right one? What do I need to be aware of? Stay on the safe side with our service and warranty services.

## Our service at a glance

### Frequently asked questions

Do you have a lot of questions? Find the answers in our online Robotic Lawnmower Support Centre.

### Planning service

#### The right robotic lawnmower for any garden

We advise on the selection and help with the planning. Online advice can be found in the Robotic Lawnmower Support Centre or with our Robotic Lawnmower Service.

### Extended warranty/Service packages

#### Carefree mowing

With the GARDENA extended warranty you are fully covered, and you can choose from various service packages to find the one that suits you best.

### Installation service

#### Install and let it mow

It is easy to install a GARDENA robotic lawnmower. If you don't have time to do it yourself, let a professional do the job for a flat fee.

### Installation films

#### Here's how

Our installation films give you step-by-step instructions on how it's done.

### Instruction manuals

#### Know more

Has the instruction manual disappeared? If you need more information, get answers to your questions in the Robotic Lawnmower Support Centre.

### Inspection service

#### Check-up for your robotic lawnmower

The Comfort and Premium professional inspection services, including winter storage, make sure that your robotic lawnmower is in full working order ready for spring.

### Spring check

#### Get the robotic lawnmower ready for the new mowing season

Prepare the robotic lawnmower for the new season after its "winter sleep": Discover a guide to the spring check here.

## Never leave your garden behind

GARDENA smart system that combines watering, lawn care and more – all in one intelligent system controlled by the GARDENA smart App.

### smart Sensor

Measurement of soil moisture and ground temperature, inclusion of soil moisture to control fully automatic irrigation via GARDENA smart App

Art. No. 19040

### smart Water Control

Automatic irrigation via smart App, ideal for use with Micro-Drip-System or Sprinklersystem

Art. No. 19031

### smart Irrigation Control

Water multiple areas via smart App, control up to six 24 V irrigation valves per device

Art. No. 19032
